

## Easy 3-Step Installation Guide

Before removing the adhesive protective liner, do a dry run and test each step to make sure the installation will work. The SecureHold™ adhesive is meant to be used once only and cannot be repositioned if done incorrectly.

### Important:

Qdos wants to keep your children safe and for that we need you to do your part by carefully reading and following the instructions below.

For installation videos and FAQ go to: [QdosSafety.com](http://QdosSafety.com)

### Parts List:

TIP: Install the Corner Protectors in the evening to allow the adhesive to set over night.

### Step 1 - Determine Double or Single Protection

#### Double Protection

- Besides getting hurt from running or falling onto corners, children also hurt themselves when standing up and hitting table corners from below
- Based on this we strongly recommend using two Corner Protectors where possible

#### Single Protection

- Use on glass tables and other furniture corners (TV stand, dresser, cabinet, etc.).

### Step 2 - Prepare Surface

Thoroughly clean the surface where you will attach the adhesive for the Corner Protector.

### Step 3 - Attaching Corner Protectors

Remove Protective Liner

Attach Corner Protector by lining up the inner corner with table/furniture corner.

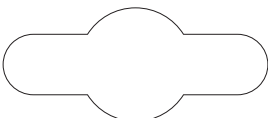

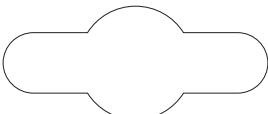

Press firmly for 30 seconds. Leave for 24 hours to set for maximum adhesion.

### Permanent Removal

Use a rounded knife and carefully pry under the Corner Protector until the tape tears. Be careful not to damage furniture with the knife. For remaining tape residue, use a finger to simply rub it away. If any residue still remains, use a cleaner that will not damage the surface you are removing the residue from. There is no way to test all possible surfaces SecureHold™ Adhesive will be applied to; please use caution when removing to avoid damaging the surface. SecureHold™ adhesive may cause damage to some surfaces.

Make your home safer with **Qdos!**

Each day, 7 children are treated in hospital emergency rooms for electrical shock or burn injuries caused by tampering with a wall outlet (Electrical Safety Foundation International).

Over 50% of outlets are never used! Eliminate the hazard of electrical shock or burn injuries by covering unused outlets with the **Qdos StayPut™ Double Outlet Plugs.**
